### HOW TO REPLY TO THIS NOTICE:

I. Review the ENTITY STATUS shown above. If the ENTITY STATUS is shown as SMALL or MICRO, verify whether entitlement to that entity status still applies.

If the ENTITY STATUS is the same as shown above, pay the TOTAL FEE(S) DUE shown above.

If the ENTITY STATUS is changed from that shown above, on PART B - FEE(S) TRANSMITTAL, complete section number 5 titled "Change in Entity Status (from status indicated above)".

For purposes of this notice, small entity fees are 1/2 the amount of undiscounted fees, and micro entity fees are 1/2 the amount of small entity fees.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER: Maintenance fees are due in utility patents issuing on applications filed on or after Dec. 12, 1980. It is patentee's responsibility to ensure timely payment of maintenance fees when due. ## Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

## OMB Clearance and PRA Burden Statement for PTOL-85 Part B

The Paperwork Reduction Act (PRA) of 1995 requires Federal agencies to obtain Office of Management and Budget approval before requesting most types of information from the public. When OMB approves an agency request to collect information from the public, OMB (i) provides a valid OMB Control Number and expiration date for the agency to display on the instrument that will be used to collect the information and (ii) requires the agency to inform the public about the OMB Control Number's legal significance in accordance with 5 CFR 1320.5(b).

The information collected by PTOL-85 Part B is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 30 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, Virginia 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450. Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

*Notice of Pre-AIA or AIA Status*

1. The present application, filed on or after March 16, 2013, is being examined under the first inventor to file provisions of the AIA.
2. Claim 10 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 8/2/19.
3. Claim 10 has been cancelled.
4. Claims 1-9 are allowed.
5. The following is an examiner's statement of reasons for allowance: the Examiner has not found any prior art that would render obvious the claimed GBAS predicting a tropospheric refractive index including the particular configuration of the processor establishing a back propagation (BP) neural network including the claimed steps of: grouping refractive indexes into groups, each group having an interval; drawing a distribution histogram of frequencies of occurrences of refractive indexes based on the groups; selecting a test set and training set according to a data amount of each group of indexes according to the frequency of each group of indexes; setting a number of hidden layers of the BP neural network and passing each group through an input layer, hidden layers and an output layer; calculating an error of each group of indexes in the neural network during a forward pass process, distributing the error to the output layer, the hidden layers and the input layer to initiate a backward pass; repeating the above steps to correct weights of the output and hidden layers; and selecting a refractive index from the test set to the preliminarily established BP neural network to determine if the establishment of the network is complete or cannot satisfy the prediction result.

6. The following prior art is considered to be the most relevant prior art found by the Examiner.

7. Wang et al ("*A Regional Tropospheric Model for Airborne GPS Applications*") disclose a technique for constructing a regional tropospheric model for airborne GPS applications using a Projection Extension Method (Figure 1).

8. Javeed et al ("*A Modified Artificial Neural Network Based Prediction Technique for Tropospheric Radio Refractivity*") disclose a technique (FIG. 1) for the use of a neural network to predict refractivity in the troposphere including a data preparation module (Section 2.1) applying pre-processing to make data compatible, a feature selection module (Section 2.2) discarding irrelevant and redundant data, and a forecast module (Section 2.3) for prediction using an artificial neural network. The technique uses historical meteorological data over a plurality of years.

9. Pikridas et al ("*Predicting Zenith Tropospheric Delay Using the Artificial Neural Network Technique. Application to Selected EPN Stations*") disclose the use of a neural network for predicting tropospheric refractivity wherein Section 2 provides an overview thereof including during the training/learning process iteratively adjusting biases using a back propagation algorithm. The architecture of the neural network including input layer, hidden layers and an output layer.

10. Xiao et al ("*Construction of a Regional Precise Tropospheric Delay Model Based on Improved BP Neural Network*") use an improved BP neural network to establish a model for predicting tropospheric delay data (refractivity effects) that makes full use of large-scale historical data describing the spatial distribution of the tropospheric delay.

11. Zheng et al (*“Research on Regional Zenith Tropospheric Delay Based on Neural Network Technology”*) disclose a technique for predicting tropospheric refractivity for improving GPS positioning and incorporates a back propagation neural network (BPNN), see figure 4.
12. Additionally, Wang et al (10,282,673) is related to the Applicant’s subject matter.
13. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
14. Any inquiry concerning this communication or earlier communications from the examiner should be directed to GREGORY C ISSING whose telephone number is (571)272-6973. The examiner can normally be reached on Mon-Thurs 6:30-5:00.
